Subject Index

A

Acrylonitrile, plasma polymerization of, electrode type and substrate temperature effects, 485
Aging
hot-water pipe, crosslinked polyethylene in, 202
polycarbonate, isothermal volume relaxation, 762
Anisotropy
deformation and, triaxially oriented polymers, 635
deformation-induced, polymers, 1281
Antiplasticization, internal, diglycidyl ether of bisphenol A, 321
Autoclave processing, cure cycles in, graphite/epoxy composites, 1141

B

Binary blends
interface in, 741
nylons, ethylene vinyl alcohol copolymers, 341
Bingham fluids, dip coating with, finite element analysis, 1125
Birefringence
distribution, compact discs of polycarbonate, 813
plastic substrates, magneto-optical storage disks, 1133
Bisphenol A, poly(styrene-co-acrylonitrile) blend, phase morphology coarsening, 1484

C

Carbon-black agglomerate, dispersion, simple shear flow, 701
Carbon black-polyethylene systems, segregated, electrical and dielectric properties, 459
Carbon fibers, grafing of liquid crystal polymer on, 603
Cast film process, numerical solutions, 335
Cellulose, blends with nylon 6 and poly(ε-caprolactone), solution-coagulation method, 71
Chain addition polymerization, thermosets formed by, gelation in, 83
Chain structure, polymer blends, 753
Chromatography, size exclusion, polyester/polycarbonate blends, 59
Coat-hanger die, dual cavity, vortex formation in, 1220
Coatings
dip, Bingham fluids, finite element analysis, 1125
in-mold process, mathematical model, 677
Cold drawing, elastic films, 1299
Composite polymer plant, design of, 416
Continuous mixers, modeling of, 893
Continuous stirred tank reactors, dynamics of, styrene polymerization, 279
Copolyester, liquid crystalline, rheological properties, 124
Copolymerization model, simulating reactive processing, unsaturated polyester resins, 684
Copolymers
ethylene vinyl alcohol, binary blends of nylons with, 341
polyester-polystyrene block, phase morphology in polymer blends and, 30
Cox-Merz rule, rheometry for polymer melts, 308
Crack growth, slow, accelerated tests for evaluating, polyethylene copolymers in igepal and air, 1175
Crack healing, methanol-induced, poly(methyl methacrylate), 1399
Crack propagation, fatigue, polystyrene, 1303
Crystallization, polymer, nucleation in, 270
Crystallization rate coefficient, polymeric materials, 1615
Crystals, liquid, polymer blends, 1005
CSTR: *see* Continuous stirred tank reactors
Curing
autoclave processing, graphite/epoxy composites, 1141
dielectric behavior of epoxy resin during, 219
epoxy resin, calorimetric and microwave dielectric monitoring of, 366
Cushioning materials
open cell foam used as, 197
polymeric foam, energy absorption characteristics, 129

D

Deformation
anisotropic yielding and, triaxially oriented polymers, 635
solid-bed, performance of plasticating single-screw extruders, 665
yielding and anisotropy, polymers, 1281
Devolatilization
bubble-free, counterrotating nonintermeshing twin-screw extruder, 424
polymer melts, 1493
direct injection gas-liquid chromatography method, 1500
twin screw extrusion, 621
Dicarboxylates, polymeric stannous, 1151
Die
blow molding, non-axisymmetric parison extrusion, 1537
coat-hanger, dual-cavity, vortex formation in, 1220
oscillating, polymer extrusion, 1551
swelling, nonisothermal annual analysis, 235
Dielectric behavior
AC and DC properties, polypropylene/calcium carbonate composites, 374
epoxy resin, during cure, 219
monitoring, epoxy resin cure, 366
PEEK crystallization, 314
segregated ferrite polystyrene composites, 469
segregated carbon black-polyethylene systems, 459
Diglycidyl ether of bisphenol A, internal antiplasticization of, 321
Double bubble tubular film process, biaxially oriented poly(p-phenylene sulfide) film, 1228
Drawdown, extrudate swell and, extruded profile dimensions and shape, 1544
Drying, polycarbonate pellets, model for, 1352

E

Elastomer blends
polystyrene-co-maleic anhydride, reactive processing, 1073
swollen, compression modulus measurements, 1591
Electron sensitivity, chemical structure relations, polymers, 449
Environmental exposure
adhesively bonded beams, 249
detergent assisted stress cracking, low density polyethylene, 1431
Epoxy, structural heterogeneity, 835
Epoxy mortar, performance, strain rate and temperature effects, 734
Epoxy resin
cure, calorimetric and microwave dielectric monitoring of, 366
dielectric behavior, during cure, 219
glasses, viscoelastic response, different thermal treatments, 431
with reversible crosslinks, mechanical and thermal properties, 303
Ethylene vinyl alcohol, copolymers, binary blends with nylon, 341
Extrudate swell, drawdown effects and, extruded profile dimensions and shape, 1544
Extruders

single-screw, plasticating, performance of, 665
twin-screw
counter-rotating closely intermeshing, 1529
counterrotating nonintermeshing, bubble-free devolatilization in, 424
nip region, studies of flow, 1382
Extrusion
blends, containing thermotropic liquid crystalline polymer, 1442
non-axisymmetric parison, blow molding die design for, 1537
oscillating die in, 1551
plasticating single-screw, experimental study, 1557
reactive
polyethylene/polypropylene blends, 1063
poly(phenylene oxide)/polyamide blends via, 1056
sound wave system, 1574
twin screw, devolatilization, 621

F

Fillers
polymer, flow induced interactions, 1361
surface-modified, polyethylene compounds, 263
Films
blown
polyethylene, 1205
polypropylene, biaxially oriented, 1259
cast process, numerical solutions, 335
copper, interface with polyimide substrate, ion beam mixing, 137
elastic, neck formation in the cold drawing of, 1299
PEN, uni and biaxially stretched, 721
polymer
solvent-casting thin, 118
spin-coated, surface topography of, 644
Flexible spacer groups, PET blends, thermotropic polyesters and, 13, 22
Flow analysis network, improved, irregular geometries, 1607
Flow-drawing, PET, 1252
Foam: *see* specific type
Fourier transform infrared spectroscopy, thermal oxidation of nylon 66, 1595
Fracture
knit line, injection molded liquid crystalline polymers, 1620
mechanical behavior, toughened polyacetal, 543
mechanics parameters, polystyrene under high speed impact, 597
toughness
ductile polymers, 211
impact modified polymers, *J*-integral, 1341, 1345
tests, polymers, 241
Functionalization, polypropylene/polyethylene terephthalate blends compatibilized through, 355

G

Gate, location optimization, injection mold, 873
Gelation, thermosets, formed by chain addition polymerization, 83
Glass
epoxy, viscoelastic response, different thermal treatments, 431
polymers, large strain compressive and tensile response of, 1288
Glass beads, polymer melts filled with, thermorheological analysis, 821
Graphite/BMI composite, cure of, residual stress development, 1465
Graphite/epoxy composites, autoclave processing, cure cycles in, 1141

H

Halatopolymers, thermotropic liquid crystalline, 1147
Heat capacity, polypropylene composites, high pressure and temperature, 476
Heating barrel, temperature measurement, during injection molding, 385
Hele-Shaw flows, 3D-fiber orientation, numerical prediction, 848
Hexamethyldisiloxane, plasma polymerization of, electrode type and substrate temperature effects, 485
Homopolystyrene
blending, styrene content of styrene-butadiene-styrene block copolymer, 1180
small amount, effects on low styrene content styrene-butadiene-styrene block copolymer, 49

I

Impact testing, polymers, inertial effects, 1117
Injection molding
crystallization phenomena, poly(ether ether ketone), 967
filling, iterative boundary pressure reflection method for, 1513
liquid crystalline polymers, knit line fractures in, 1620
low pressure structural, foam, bubble growth in, 1330
optimization of design, 873, 883
polypropylene/polycarbonate blends, 1051
polystyrene, V-notch at weld lines, 931
reaction, polyureas, 654
rotary injection reaction, 162, 175
structural reaction, process parameter estimation for, 142
temperature measurements of polymer melts, heating barrel, 385
thermal contact resistance in, 1599
Integrated circuit molding compounds, thermomechanical properties, 609
Ion beam mixing, enhancing adhesion, interface between copper film and polyimide substrate, 137
Iterative boundary pressure reflection method, simulation, injection mold filling, 1513

J

***J*-integral,** fracture toughness, impact modified polymers, 1341, 1345

L

Laminar flow, measures of mixing in, 153
Liquid crystalline polymers
grafting, carbon fibers, 603
injection molded, knit line fractures in, 1620
poly(ethylene terephthalate) with, processing, 519
rheological properties, 124
thermoplastic, morphology and mechanical properties, 532
thermotropic, extruded blends containing, 1442
Liquid crystal polymer-carbon fiber composites, molecular orientation, 228

M

Macromolecular nomenclature, recommendations on, 1183
Magneto-optical storage disks, plastic substrates for, birefringence, 1133
Melt-blowing process, continuous polymeric filaments manufactured by, 1237
Melt compounding, polymer blend components migration during, 1628
Melt immiscibility, crosslinked polyethylene, 444
Melting, conduction, polymer pellets, 1200
Metal beams, adhesively bonded, dynamic mechanical response, 249
Methanol, crack healing induced by, poly(methyl methacrylate), 1399
Methyl methacrylate, grafted rubbers, impact modification of styrene-acrylonitrile copolymers, 1373
Microcapsules, microspheres and, survey of manufacturing techniques, 905, 915
Microcellular foam, flexible, from polymethylpentene cyclohexane, 90
Microlithography, PET crystallization as method for, 1165
Microspheres, microcapsules and, survey of manufacturing techniques, 905, 915
Miscible phenolphthalein poly(ether ether ketone)/polysulfone blends, mechanical properties of, 44
Mixing, measures of, laminar flow, 153
Molding compounds, integrated circuit, thermomechanical properties, 609
Molding force, prediction of, 1568
Molecular weight
distribution
modality and, 569
polypropylene physical properties and, 1504
perfluoropolyethers, 829
solvent and, thickness and surface topography of spin-coated polymer films, 644

Multicomponent polymer systems, molecular design of, 937

N

Neck formation, elastic films, 1299
Nonisothermal coextrusion, simple model, 408
Nucleation, polymer crystallization, 270
Nylon 6
liquid-crystalline polymer blends, rheology-morphology, 7
poly(ε-caprolactone) and, blends of cellulose with, 71
Nylon 66, thermal oxidation of, photoacoustic Fourier transform infrared spectroscopsy, 1595

O

Open cell foam, used as cushioning materials, 197
Optical fibers, dual coated, calculated stresses in, 108

P

PEEK: *see* Poly(ether ether ketone)
PEN: *see* Poly(ethylene 2,6 naphthalate)
Perfluoropolyethers, physical properties, composition and molecular weight, 829
PET: *see* Poly(ethylene terephthalate)
Phase morphology, polymer blends, 753
Phenol/cresol-formaldehyde resin, product hardness and, 257
Phenolic triazine resins, cure characterization, dynamic melt rheology, 1171
Plasma polymerization, temperature effects, two model components, 485
Plastic/rubber blends, morphology, 511
Plastic substrates, magneto-optical storage disks, birefringence, 1133
Poly(1,4-cyclohexylene dimethylene terephthalate) blends, evaluation for improved processability, 1041
Polyacetal, toughened, thermoplastic polyurethane elastomer, mechanical fracture behavior, 543
Polyamide blends, repulsive interactions in, 998
Polyarylate alloys, film and membrane properties, 1
Polybenzimidazoles
blends, miscibility studies, 798
film and membrane properties, 1
Poly(ε-caprolactone), nylon 6 and, blends of cellulose with, 71
Polycarbonates
aged, isothermal volume relaxation, 762
compact discs, birefringence distributions in, 813
pellets, drying, 1352
Polycarbonate/acrylonitrile-butadiene-styrene blends, reprocessing, 527
Polycarbonate/polyethylene blends, VAMAS, dynamic mechanical properties, 1106
Polycarbonate/styrene-acrylonitrile copolymer blend
bisphenol A blend, phase morphology coarsening, 1484
phase morphology, 1474
Polyester/polycarbonate blends, size exclusion chromatography, melt rheometry and, 59
Polyester-polystyrene block copolymers, phase morphology and, polymer blends, 30
Polyester resins, additive blends, unsaturated, morphology of, 1585
Poly(ether ether ketone)
crystallization
dielectric characterization, 314
injection molding of, 967
structure-mechanical property relations, 860
transparent, thermal behavior, 453
Polyethylene
blown film, optimizing, 1205
crosslinked
aged hot-water pipe, 202
melt immiscibility in, 444
high density, recycled, compounding wood fibers with, 693
high and low density, bulk and surface compression viscosities, 326
low density, detergent assisted stress cracking, 1431
modeling, viscoelastic material characterization and, 577
polycarbonate/linear low density, rheology of, 1027
rotational molding, warpage in, 1523
Poly(ethylene 2,6 naphthalate), film, uni and biaxially stretched, 721
Polyethylene compounds, surface-modified fillers, 263
Polyethylene copolymers, accelerated crack growth, 1175
Polyethylene gel, ultra-high molecular-weight, low-density foams produced from, 783
Polyethylene-polyamide blends, morphology-processing relations, 553
Polyethylene/polypropylene blends, reactive extrusion, 1063
Poly(ethylene terephthalate)
blends of, interfacial adhesion and mechanical properties, 13
crystallization, method for microlithography, 1165
flow-drawing of, 1252
processing blends of, several liquid crystalline polymers, 519
Polyimide substrate, interface with copper films, ion beam mixing, 137
Polymer blends
see also specific blend
analysis of morphology, reflection light scattering techniques, 1090
chain structure, phase morphology and toughness, 753
components, migration during melt compounding, 1628
ductile, fracture toughness of, 211
extruded, containing thermotropic liquid crystalline polymer, 1442
inertial effects, impact testing, 1117
liquid crystals in, 1005
nylon 6/liquid-crystalline, rheology-morphology, 7
phase morphology in, polyester-polystyrene block copolymers in, 30
thermotropic polyester in, with long flexible spacer, 22
Polymer fibers, perfect, breaking strength, 437
Polymeric fabric, woven, elastic properties of, 1309
Polymeric filaments, continuous, manufactured by melt-blowing process, 1237
Polymeric foam
energy absorption characteristics, cushioning materials, 129
low pressure structural molding, bubble growth during, 1330
Polymeric solutions, spin-coating of, 193
Polymer interfaces, reflection methods for study, 1085
Polymerization reactors
constrained optimal batch, control of, 1209
continuous vinyl chloride bulk, dynamic behavior of, 291
continuous vinyl chloride suspension, dynamic behavior of, 925
CSTR, styrene, 279
multiloop control of, 350
Polymer melts
devolatilization, 1493
direct injection gas-liquid chromatography method, 1500
flow, screw channel, 400
glass bead-filled, thermorheological analysis, 821
thermal conductivity of, measurement by line-source method, 65
torsional and capillary rheometry for, 308
Polymer pellets, conduction melting, 1200
Polymers
see also specific type
amorphous, thermal history effects, 1266
crystallization, nucleation in, 270
crystallization rates, barometer of, 1615
deformation processing, yielding, anisotropy and, 1281
filler interactions, flow induced, 1361
films, solvent-casting thin, 118
glassy, large strain compressive and tensile response of, 1288
impact fracture toughness tests, 241
model-filled, 1158
triaxially oriented, anisotropic yielding and deformation in, 635
Poly(methyl methacrylate)
crack healing in, methanol-induced, 1399
transition mechanism in, 96
Polymethylpentene/cyclohexane, flexible microcellular foam from, 90
Polyolefins, rutile-filled, processing of, 950
Poly(phenylene oxide)/polyamide blends, reactive extrusion, 1056
Poly(p-phenylene sulfide)
crystallization of, 944

film, double-bubble tubular process, 1228
Polypropylene
blown films, biaxially oriented, 1259
drawing temperature, molecular weight distribution effects, 1504
filled with $CaCO_3$ and $Mg(OH)_2$, yield behavior, 707, 714
isotactic, incompatible blends, 1098
melt blown webs, structure and filtration properties, 1413
Polypropylene/calcium carbonate composites, AC and DC dielectric properties, 366
Polypropylene composite, heat capacity of, high pressure and temperature, 476
Polypropylene melts, $CaCO_3$ -filled, dispersion particle effects on viscoelasticity, 841
Poly(propylene oxide), isotactic (D,L), crystallization, fine-particle silica and, 769
Polypropylene/polycarbonate blends, injection molding of, 1051
Polypropylene/polyethylene terephthalate blends, compatibilized through functionalization, 355
Polystyrene
fatigue crack propagation, damage effects, 1303
high speed impact, fracture mechanics parameters for, 597
Polystyrene beads
cross-linked, rheological behavior, 1158
segregated ferrite, dielectric and magnetic properties, 469
Polystyrene melts, steady shear viscosity, modified power law model for, 587
Polystyrene/polyethylene blends, uniaxial extension flow of, 1019
Polyureas, reaction injection molding, 654
Poly(vinylidene fluoride), concentrated solution, melt rheology and, 394
Poly(4-vinyl pyridine), blends, miscibility studies, 798
Positron annihiltation lifetime spectroscopy, isothermal volume relaxation, aged polycarbonate, 762
Process parameter estimation, molding, 142

R

Recycling, high density polyethylene, wood fibers compounded with, 693
Reflection light scattering technique, analysis of polymer blend morphology, 1090
Repulsive interactions, role in polyamide blends, 998
Resin
phenol/cresol-formaldehyde, produce hardness and, 257
solid polymer, bulk density of, 571
unsaturated polyester, reactive processing of, copolymerization model for, 684
Resin transfer molding, process parameter estimation for, 142
Rheology
dynamic melt, phenolic triazine resins, 1171
melt, poly(vinylidene fluoride), 394
Rheometry
melt, polyester/polycarbonate blends, 59
torsional and capillary, polymer melts, 308
Rolltrusion, polymers, 3-D structure-property relations, 635
Rotary injection reaction, injection molding, 162, 175
Rotational molding, polyethylene, warpage in, 1523
Rubber
methyl methacrylate grafted, impact modification of styrene-acrylonitrile copolymers, 1373
plastic blends, morphology, 511
Rubber-epoxy-alloy systems, morphology and properties control on, 493

S

Screw channel, polymer melt flow in, 400
Screw geometry, effects on temperature measurements, heating barrel during injection molding, 385
Segregation, effects, polymerization reactors, 925
Semicrystalline polymers, interfaces, incompatible, strength development, 1454
Shear flow, simple, carbon-black agglomerate dispersion in, 701
Sheet molding compounds, dimensional stability, property gradients and, 805
Silica, fine-particle, crystallization of isotactic (D,L) poly(propylene oxide), 769
Solidification, liquid, viscous dissipation effects, 776
Solution-coagulation method, cellulose blends, nylon 6 and poly(ε-caprolactone) with, 71
Solvent
evaporation, effects on spin-coating of polymeric solutions, 193
molecular weight and, thickness and surface topography of spin-coated polymer films, 644
removal, solvent-casting thin polymer films, 118
Spherulite, enhanced growth rate, isotactic polypropylene, 1098
Spin-coating, polymer solutions, 193
Strain rate, temperature and, epoxy mortar performance, 734
Stress
calculated, dual coated optical fibers, 108
cracking, detergent assisted, low density polyethylene, 1431
residual, development during cure of graphite/BMI composite, 1465
Styrene
emulsion polymerization of, continuous loop tubular reactor for, 187
polymerization, CSTR for, 279
Styrene-acrylonitrile copolymers, impact modification of, methyl methacrylate grafted rubbers, 1373
Styrene-butadiene rubber-ethylbenzene systems, correlation of mutual diffusion coefficients, 480
Styrene-butadiene-styrene block copolymer
low styrene content
blending small amounts of homopolystyrene and, 1180
small amount of homopolystyrene effects, 49
Suspensions, mixed dissimilar particles, fluidity and optimum packing in, 1407
Swelling
die, nonisothermal annual analysis, 235
elastomers, compression modulus measurements, 1591

T

Temperature
drawing, polypropylene physical properties and, 1504
strain rate and, epoxy mortar performance, 734
Thermal conductivity, polymer melts, measurement by line-source method, 65
Thermal contact resistance, injection molding, 1599
Thermal history, amorphous polymers and, 1266
Thermoforming, 3-D finite element simulation of, 1314
Thermoplastic foam, ultrasonic processing, 147
Thermoplastic parts, microcellular, process for, 1323
Thermoplastic polyurethane elastomer, mechanical fracture behavior, 543
Thermoplastics
flow, annular parallel oscillations, 1574
short-fiber-reinforced, injection molded parts, fiber orientation in, 957
Thermoplastic sheet, self-reinforced, deep drawing, 1185
Thermosets, formed by chain addition polymerization, gelation in, 83
Thermotropic liquid crystalline polyester
blends of, interfacial adhesion and mechanical properties, 13
morphology and mechanical properties, 532
polymer blend containing, 22
Thermotropic liquid crystalline polymers, solidification behavior, recovery kinetics and, 989
Transition mechanism, poly(methyl methacrylate), 96
Tubular reactor, continuous loop, emulsion polymerization of styrene, 187

U

Ultrasonic processing, thermoplastic foam, 147
Ultraviolet resist, negative deep, image reversal in, 1346

Uniaxial extension flow, polystyrene/polyethylene blends, 1019

V

Vector voltage study, dielectric behavior of epoxy resin, during cure, 219
Versailles Project on Advanced Materials and Standards (VAMAS), polycarbonate/polyethylene blends, 1106
Vinyl chloride monomer, dynamic behavior, suspension polymerization reactors, 291
Vinyl polymers, electron sensitivity, 449
Vinyl systems, crosslinked, component interactions and properties, 981
Viscoelasticity, dispersion particle effects, $CaCO_3$-filled polypropylene melts, 841
Viscosity
bulk and surface compression, high and low density polyethylene, 326
polystyrene melts, modified power law model for, 587
Viscous dissipation, liquid solidification and, 776
Viscous fluids, non-Newtonian, 3-D flow analysis, 1420
V-notch structure, weld lines, polystyrene injection moldings, 931
Vortex formation, dual-cavity coat-hanger die, 1220

W

Wood fibers, compounded with high density polyethylene, composites from, 693

Y

Yield behavior, polypropylene, filled with $CaCO_3$ and $Mg(OH)_2$, 707, 714
